**ECHO Resource List**

Below is a detailed list containing many of the resources available for checkout from ECHO and their associated tier access levels. The ECHO Online Reservation Portal will have a more comprehensive list of available to users.

**Tier Access**

Resource Tiers are used to ensure that higher level resources are available and in proper working order for those users that know how to utilize them responsibly. Tiers can be determined by class needs, resource complexity, limited availability, or any other criteria that may require ECHO to restrict the amount of users that can access the resource.

**Tier 1:** The majority of ECHO resources fall within this tier. These resources are available to all users eligible to borrow from the Stamps ECHO inventory.

**Tier 2:** This tier is for resources reserved for users either currently enrolled within a required course or that have successfully completed the course. Speak with the ECHO Coordinator about what courses may grant access to Tier 2 resources.

**Tier 3:** This tier is for resources that are in limited supply, require a high level of understanding, or simply need to be more tightly controlled. Users interested in borrowing Tier 3 resources will need to arrange a time to speak with the ECHO Coordinator for authorization.

**Cameras**

- Canon Vixia HD camcorders
- Panasonic HMC40 HD camcorders (Tier 2)
- Panasonic HMC150 HD camcorders (Tier 3)
